PROJECTS

Login-Singup(Python)

This is python based SignUp and login system, Where user can signup first and signup user can only login through the system.

HangMan(Python)

It's a game of guess right word to avoid loss of human parts.
I used python for developing this game.

WebScrapping (Python)

Successfully scrapped data from IMDB website through api and stored data in JSON format.
Technologies : BeautifulSoup, Requests, Python.

PortFolio (HTML and CSS)

In portfolio I used HTML and CSS. I made 5 pages, In first page I links all the files. In these files I used so many things like I took images from google and put them in the background.

Thinking and implementation of creative designs(HTML and CSS)

Thinking and implementation of creative designs website in I used only HTML and CSS.

Login-Signup(JavaScript)

This is JavaScript based SignUp and login system, Where user can signup first and signup user can only login through the system.
